

tarmac

WE ARE TARMAC

We are a nomadic group of software developers that live in various countries across North and South America. Our goal is simple. We would like to change the perception of remote software development by attracting and organizing the most talented software developers in the Americas.

HOW CAN WE HELP YOU?

Your business problem could be as specific as an app not working, but as complex as industry changing technology. We want to help you with all of them.

WE BUILD SCALABLE SOLUTIONS FOR GROWING USER EXPECTATIONS.

Our bread-n-butter has always been Ruby on Rails, but that doesn't mean we will ever let technology decisions trump business needs.

HOW WE HELP OUR CLIENTS

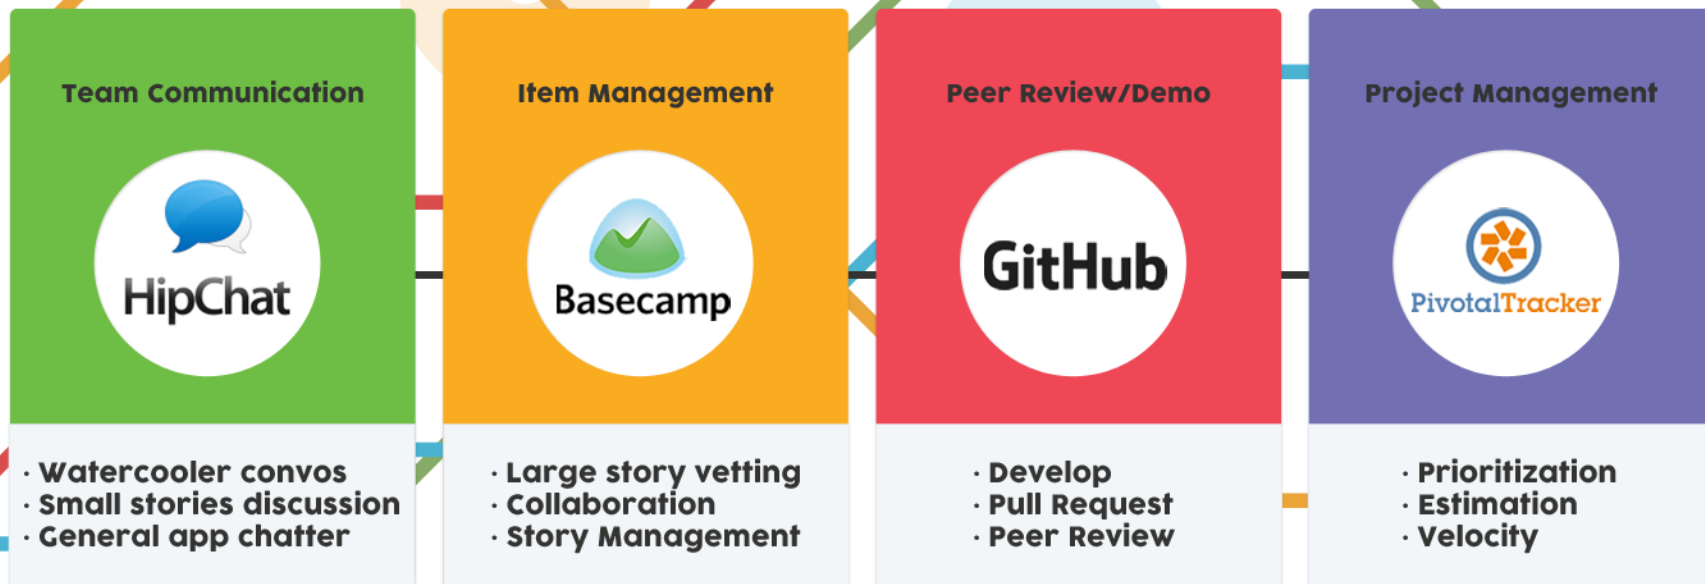

OUR SOLUTIONS MAXIMIZE EFFECTIVENESS.

Our goal is to continually reduce the amount of time it takes to deliver a feature. From our perspective, fast and interactive feedback from the client is the only way to achieve success. We do this by having daily stand-ups, relying on continuous integration, and by constantly showing our work.

COLLABORATION

OUR PROCESS BEGINS AND ENDS WITH THIS.

Every process and tool that we utilize is in an effort to make collaboration easy. In our experience, if everything is transparent and well-documented, the likelihood of a successful project is drastically higher.
